

Summer Math Review and "Preview" of Singapore Math for incoming 3rd and 4th Graders

With Mrs. Herrick

Does your child need a Math Review to kick-off the school year?

This will be a hands-on, fun-filled approach to math - sure to get your child excited about learning! We will be reviewing skills from your child's current year using games and drills so that your child will be ready to succeed next year. We will strengthen facts and reinforce key concepts that your child will be using next year with the Common Core Standards and make sure that these important skills are ready for the first day of school.

** I will also be introducing new vocabulary, concepts, and skills that we will be using with our NEW Singapore Math Program**

We will meet to review place value, addition, subtraction, multiplication and division, fractions, and any other skills necessary to help your child prepare.

Each meeting will be tailored to fit the students' needs, so please fill out the following page with some specifics that your child should focus on. I am limiting the number of students to the first 10 registered in each class so that we keep a low ratio for optimum learning.

Monday- Friday, August 11-15. We will meet in the 4th grade classroom. Please come through the front office.

Incoming 3rd Grade 8:30-9:30 am

Incoming 4th Grade 9:35- 10:35 am

The cost is \$100 for the week.

Spots will be reserved for the first 10 paid reservations in each class by July 31. This payment is non-refundable.

If you have **any** questions, please contact me at aherrick@stignatiussac.org.

Amy Herrick

Summer Math Review for Incoming 3rd Graders

Student Name: _____

Parent Information:

Name: _____

Phone Number: _____

Email: _____

What concepts or skills do you think your child would benefit from most?

Please mail your payment of \$100 (cash or check made out to Amy Herrick) to 4355 Briarwood Drive Sacramento, CA 95821. I will email you to confirm your child's placement. Spaces will be reserved for the first 10 paid registrations on or before July 31st. This payment is non-refundable.

Summer Math Review for Incoming 4th Graders

Student Name: _____
