

Persons Who Test Positive for COVID-19	Recommended Actions
Everyone, regardless of vaccination status, previous infection, or lack of symptoms.	<p data-bbox="743 240 1860 326">Stay home (PDF) for at least 5 days after start of symptoms (Day 0) or after date of first positive test (Day 0) if no symptoms).</p> <ul data-bbox="793 370 1860 1154" style="list-style-type: none"> <li data-bbox="793 370 1860 565">● Isolation can end after Day 5 if: <ul data-bbox="890 423 1860 565" style="list-style-type: none"> <li data-bbox="890 423 1860 456">○ Symptoms are not present, or are mild and improving; AND <li data-bbox="890 477 1860 565">○ You are fever-free for 24 hours (without the use of fever-reducing medication). <li data-bbox="793 586 1860 667">● If fever is present, isolation should be continued until 24 hours after fever resolves. <li data-bbox="793 688 1860 769">● If symptoms, other than fever, are not improving, continue to isolate until symptoms are improving or until after Day 10. <li data-bbox="793 790 1860 932">● If the confirmed case has severe symptoms, or is at high risk of serious disease or has questions concerning care, they should contact their healthcare provider for available treatments. <li data-bbox="793 953 1860 1040">● Per CDPH masking guidance, infected persons should wear a well-fitting mask around others for a total of 10 days, especially in indoor settings.* <li data-bbox="793 1062 1860 1154">● After you have ended isolation, if your symptoms recur or worsen, get tested again and if positive, restart isolation at Day 0.

*After ending isolation (no fever without the use of fever-reducing medications and symptoms are improving), confirmed cases may remove their mask sooner than Day 10 if they have two sequential negative tests at least one day apart. If antigen test results are positive, the person may still be infectious and should continue wearing a mask and wait at least one day before taking another test.
