

Dear Parishioners,

A new school would mean to mean to me that we would be safe and well educated with big classrooms and new equipment. This school is 62 years old and I think it is time to give it a little makeover! With the new school, we would be able to have our own science lab. I would love to be able to go to the restroom without being freezing. With this new school, we would also be able to have new afterschool programs. To be able to have hallways inside is a benefit to our new school because we wouldn't have to walk in the cold when it was raining. I love the way our new school is going to be built because we have better security and better and bigger classrooms and equipment. Thank you for making our dreams come true!

Thank you,

Maren
