

Tiny Babies Grow Up!

Eggs

Do you see the tiny hummingbird eggs in the tiny nest? They are each the size of a jelly bean.

5 Days Old

What hatched? Tiny baby birds did. They want food.

13 Days Old

The baby birds grew! They have feathers now. They barely fit in the tiny nest.

21 Days Old

The baby birds can fly now. They will fly away from the tiny nest.

Clifford's Move and Learn

Why are they called hummingbirds? Their little wings flap so fast, they make a humming sound. How fast can you flap?
